

# Flow Filo

Designer	Jean Marie Massaud
Year	2019-2020

Flow Filo, created by Jean Marie Massaud, is a chair that combines innovation and craftsmanship, defined by its unique and refined design.

The steel structure, available in black chrome or nickel chrome finishes, shapes the seat, which is offered with or without a leather pad in black or ivory, with the option to upholster the backrest as well. The sled base, minimalist and contemporary, completes the design. A perfect synthesis of design and artisanal skill, Flow Filo stands out for its precise craftsmanship, with slender steel wires welded together to create a lightweight and sophisticated structure.

The seat integrates seamlessly into both classic and contemporary spaces, asserting itself as a distinctive and elegant feature for any setting. Flow Filo is also available in an outdoor version, powder-coated in matt bronze or black nickel finishes and treated to withstand outdoor conditions without compromising its elegance.

## Frame

Matt powder-coated steel rod or polished chrome.

## Pad

Seat and backrest.

In non-removable saddle-hide with polyurethane padding or FreeForm polyurethane.

## Flow Filo finishes
