

S Table

Designer	Xavier Lust
Year	2007-2019

A name that embodies its iconic shape: S Table. The sinuous S-shaped twist of the base, designed by Xavier Lust, reflects the visible tension that defines the work of the award-winning designer. The dynamic curves, inspired by the process of deforming metal surfaces, are a distinctive signature of his creative journey.

The base, crafted in Cristalplant®, a technologically advanced, hypoallergenic, and non-toxic material, or in reconstructed stone, can be paired with a variety of tops available in glass, wood fiber, marble, reconstructed stone, or Cristalplant®. This combination of materials and finishes allows for customisation, making S Table a unique and versatile piece, seamlessly fitting into a range of settings, from residential to contract.

Glass top

Clear or extra clear glass, 15 mm thick.
Clear or extra clear tempered glass, 15 mm thick.

Cristalplant top

Matt white Cristalplant®, a composite material made up of natural minerals, acrylic material and polymer polyesters.

Marble top

Marble top with matt or glossy polyester protection, 20 mm thick, plus 16 mm supporting sub-top.

Reconstructed stone frame

S-shaped twisting base, moulded in a composite material made from a blend of mineral powders that have been micronised and mixed with liquid acrylic and water-based products, giving it a material essence. The finishes are applied manually with a palette knife over the entire surface of the table. After application, a maturation process at room temperature is required. The material is subsequently protected with a water-based nanotechnological finish that makes the table sturdy and easy to clean.

Lacquered top

Matt lacquered white medium-density wood panel, 30 mm thick.

Reconstructed stone top

Textured finish obtained from a blend of mineral powders that have been micronised and mixed with liquid acrylic and water-based products, giving it a material essence. The finishes are applied manually with a palette knife over the entire surface of the table, followed by a maturation process at room temperature. The material is subsequently protected with a water-based nanotechnological finish that makes the table sturdy and easy to clean.

Cristalplant frame

S-shaped twisting base, moulded in Cristalplant®, a composite material made up of natural minerals and polyester and acrylic polymers in matt white.

Notes

Tops for base in matt white Cristalplant® and reconstructed stone white calce:

- white Cristalplant®;
- clear or extra clear glass;
- lacquered white;
- reconstructed stone white calce;
- white Namibia marble;
- white Carrara marble;
- medium grey Bardiglio marble.

Tops for base in black slate reconstructed stone:

- reconstructed stone black slate.
